

Computer Science Projects for College Students

Minor Project CSE & IT:

1. Data Warehousing and Data Mining Dictionary
2. Fuzzy Keyword Search in Cloud Computing over Encrypted Data
3. Web Based Online Blood Donation System
4. Web Based Graphical Password Authentication System
5. Identification and Matching of Robust-Face Name Graph for Movie Character
6. Controlling of Topology in Ad hoc Networks by Using Cooperative Communications
7. An SSL Back End Forwarding Scheme of Clusters Based On Web Servers
8. Motion Extraction Techniques Based Identifying the Level of Perception Power from Video
9. Approximate and Efficient Processing of Query in Peer-to-Peer Networks
10. Web Based Bus Ticket Reservation System
11. Chinese Input with Eye Tracking and Keyboard
12. Automated Image Enhancement Based Identification of Plaque
13. Developing the Encryption, API, Architecture and Security of Biometric Technology
14. Automated Transport Enquiry System in MySQL and C# Based on Voice
15. Modeling and Detection of the Camouflaging Worm
16. Increased Development Process Quality Based Testing of Automotive Real Time
17. SQL Based Employee Management System in ASP and C# .NET
18. Management System of Pharmacy in MySQL and PHP
19. Graph Analysis and Generation for Detecting the Source Code Plagiarism Based on Program
20. Implicit Approach Based Animating and Buildup of Wind Driven Snow
21. Bullet Physics and Cinder Graphics Based Doodle Processing System
22. Simulation and Modeling of Unknown Factors in Acquisition
23. Image Processing Segmentation Based Verification of Secured Fingerprint Using Computational Geometry Algorithms
24. Mathematical Morphology Based Algorithm for Image Noise Reduction
25. Flexible Data Dissemination Strategy in Mobile Wireless Communication Networks for Effective Cache Consistency

26. Fingerprint Verification System Based on a Correction
27. Automatic Removal and Estimation of Noise in From a Single Image
28. Dynamic Time Warping and Triangular matching Based on a Fingerprint Verification System
29. Smart Card Security and Static Analysis Perspective from a Java
30. Internet Based Monitoring of Remote Electrocardiogram
31. Internet Protocol Trace Back Based Detection and Modeling of Camouflaging Worm
32. Ridges and Fusion of Minutiae Based Fingerprint Identification Using Strength Factors
