

## DATA MINING

1. Sampling online social network
2. Secure Mining of Association Rules in Horizontally Distributed Databases
3. SUSIE Search using services and information extraction
4. Horizontal Aggregations in SQL to Prepare Data Sets for Data Mining Analysis
5. Scalable Learning of Collective behavior
6. Data leakage detection
7. Optimization of horizontal aggregation in SQL by using Kmeans Clustering
8. A Survey of Indexing Techniques for Scalable Record Linkage and De duplication
9. Organizing user search histories
10. One Size Does Not Fit All: Towards User-and Query-Dependent Ranking For Web Databases
11. Spatial Approximate String Search
12. A Fast Clustering-Based Feature Subset Selection Algorithm for High Dimensional Data
13. Mining User Queries with Markov Chains: Application to Online Image Retrieval
14. Crowd sourcing Predictors of Behavioral Outcomes
15. Privacy Preserving Delegated Access Control in Public Clouds
16. T-Drive: Enhancing Driving Directions with Taxi Drivers' Intelligence
17. A Survey of XML Tree Patterns
18. m-Privacy for Collaborative Data Publishing
19. Estimating Information from Image Colors: An Application to Digital Cameras and Natural Scenes
20. Facilitating Document Annotation Using Content And Querying Value
